Topical Table of Contents

Atluri, Vijay: Security and Privacy in Geospatial Information Systems

Crime Mapping and Analysis
CrimeStat: A Spatial Statistical Program for the Analysis of Crime Incidents
Geospatial Authorizations, Efficient Enforcement
Homeland Security and Spatial Data Mining
Hotspot Detection, Prioritization, and Security
Privacy and Security Challenges in GIS
Privacy Threats in Location-Based Services
Security Models, Geospatial

Banerjee, Sudipto: Statistical Modeling for Spatial Data

Bayesian Spatial Regression for Multi-source Predictive Mapping
Exploratory Spatial Analysis in Disease Ecology
Hurricane Wind Fields, Multivariate Modeling
Mathematical Foundations of GIS
Public Health and Spatial Modeling

Bedard, Yvan: Spatial Database Modeling for Applications

Modeling and Multiple Perceptions
Modeling with a UML Profile
Modeling with Enriched Model Driven Architecture
Modeling with ISO 191xx Standards
Modeling with Pictogrammic Languages
Spatio-temporal Database Modeling with an Extended Entity-Relationship Model

Chawla, Sanjay: Spatial Association Discovery

Data Analysis, Spatial
Movement Patterns in Spatio-temporal Data

Denaro, Robert: Digital Road Map

Evolution of Earth Observation
Location-Based Services: Practices and Products
Road Maps, Digital

Di, Liping: Critical Evaluation of Standard Proposals

Catalogue Information Model
Geographic Coverage Standards and Services

Metadata and Interoperability, Geospatial
National Spatial Data Infrastructure (NSDI)
OGC's Open Standards for Geospatial Interoperability
Standards, Critical Evaluation of Remote Sensing

Fonseca, Frederico: GeoSpatial Semantic Web

Geospatial Semantic Web
Geospatial Semantic Web: Applications
Geospatial Semantic Web, Interoperability
Geospatial Semantic Web: Personalization
Web Services, Geospatial

Frank, Andrew: Spatial Thinking

Approximation
Cadastre
Hierarchies and Level of Detail
Participatory Planning and GIS
Temporal GIS and Applications
Wayfinding: Affordances and Agent Simulation
Wayfinding, Landmarks

Franzese, Oscar: Emergency Evacuations

Emergency Evacuation Plan Maintenance
Emergency Evacuations, Transportation Networks
Population Distribution During the Day

Gunopulos, Dimitrios: Information Collection Using Sensor Network

Data Collection, Reliable Real-Time
Top-k Retrieval Techniques in Distributed Sensor Systems

Hoel, Erik: Commercial GIS

ArcGIS: General Purpose GIS Software System
Computer Environments for GIS and CAD
Data Models in Commercial GIS Systems
Intergraph: Real Time Operational Geospatial Applications
Rules-Based Processing in GIS
Smallworld Software Suite

Hornsby, Kathleen: Spatio-temporal Data Modeling

Geographic Dynamics, Visualization And Modeling
Processes and Events
Time Geography

Huang, Yan: Spatial Co-location Rule Mining

Co-location Patterns, Algorithms
Co-location Patterns, Interestingness Measures
Patterns, Complex
Patterns in Spatio-temporal Data
Sequential Patterns, Spatio-temporal

Kauffman, Robert: GIS Issues and Applications

Cyberinfrastructure for Spatial Data Integration
Data Infrastructure, Spatial
Data Warehouses and GIS
Decision-Making Effectiveness with GIS
Indoor Positioning
Market and Infrastructure for Spatial Data
Multicriteria Decision Making, Spatial
Multicriteria Spatial Decision Support Systems

Kazar, Baris: Spatial Prediction

Autocorrelation, Spatial
Error Propagation in Spatial Prediction
Geodemographic Segmentation
Hierarchical Spatial Models
Kriging
Sensitivity Analysis
Spatial and Geographically Weighted Regression
Spatial Econometric Models, Prediction
Spatial Regression Models

Kim, Sangho: Basic Concepts

Cloaking Algorithms for Location Privacy
Co-location Pattern Discovery
Contraflow in Transportation Network
Graph Theory, Konigsberg Problem
Image Compression
Internet GIS
Nearest Neighbors Problem
Plane Sweep Algorithm
Quadtree and Octree
Radio Frequency Identification (RFID)
Raster Data
R-trees – A Dynamic Index Structure for Spatial Searching
Semivariogram Modeling
Skyline Queries
Traveling Salesman Problem (TSP)
Vector Data
Voronoi Diagram
Web Feature Service (WFS)

Kothuri, Ravi: Commercial Spatial Databases

Oracle Spatial, Geometries
Oracle Spatial, Raster Data

Kyriakidis, Phaedon: Spatial Uncertainty and Imprecision

Imprecision and Spatial Uncertainty
Positional Accuracy Improvement (PAI)
Spatial Uncertainty in Medical Geography: A Geostatistical Perspective
Uncertain Environmental Variables in GIS

Uncertainty, Modeling with Spatial and Temporal
Uncertainty, Semantic

Li, Xinrong: Indoor Positioning

Channel Modeling and Algorithms for Indoor Positioning
Indoor Localization
Indoor Positioning, Bayesian Methods
Indoor Positioning with Wireless Local Area Networks (WLAN)
Localization, Cooperative

Liu, Henry: Evacuation Planning and Operations

Contraflow for Evacuation Traffic Management
Emergency Evacuation, Dynamic Transportation Models

Lu, Chang-Tien: Spatial Outlier Detection

Concurrency Control for Spatial Access Method
Geography Markup Language (GML)
Information Presentation, Dynamic
Nearest Neighbor Query
Outlier Detection, Spatial
Privacy Preservation of GPS Traces
Stream Mining, Spatial

Mamoulis, Nikos: Spatial Data Warehousing and Decision Support

Aggregate Queries, Progressive Approximate
Dynamic Travel Time Maps
Olap Results, Distributed Caching
OLAP, Spatial
Top-k OLAP Queries Using Augmented Spatial Access Methods

Mayer, Helmut: Photogrammetry

Data Acquisition, Automation
Laser Scanning
Photogrammetric Applications
Photogrammetric Methods
Photogrammetric Products
Photogrammetric Sensors

Meng, Liqui: Cartography and Visualization

Abstraction of GeoDatabases
Exploratory Visualization
Generalization and Symbolization
Generalization, On-the-Fly
Mobile Usage and Adaptive Visualization
Multimedia Atlas Information Systems
Scalable Vector Graphics (SVG)
User Interfaces and Adaptive Maps
Visualization, Photorealistic and Non-photorealistic
Web Mapping and Web Cartography

Mokbel, Mohamed: Basic Storage and Retrieval Structure

Aggregation Query, Spatial
Index Structures, Extensible
Indexing, High Dimensional
Retrieval Algorithms, Spatial
Space-Filling Curves
Spatial Data, Indexing Techniques

Neumann, Andreas: Open Source GIS Software

deegree Free Software
GRASS
Open-Source GIS Libraries
PostGIS
Quantum GIS
University of Minnesota (UMN) Map Server

Nittel, Silvia: Geosensor Networks

Geosensor Networks
Geosensor Networks, Formal Foundations
Geosensor Networks, Qualitative Monitoring of Dynamic Fields

Osborne, Jr., Leon : Use of Spatial Data for Simulation

Distributed Hydrologic Modeling
Environmental Planning and Simulation Tools
Hydrologic Impacts, Spatial Simulation
Rural Hydrologic Decision Support
Weather Information, Surface Transportation

Panda, Sudhanshu: Tesselation Data Models

Bayesian Network Integration with GIS
Bioinformatics, Spatial Aspects
Change Detection
Environmental Modeling Using Open Source Tools
Image Mining, Spatial
Intelligence, Geospatial
Metadata
Scale, Effects
Self Organizing Map (SOM) Usage in LULC Classification
Statistical Descriptions of Spatial Patterns
Web Feature Service (WFS) and Web Map Service (WMS)

Parthasarathy, Srinivasan: Spatial Aspects of Bioinformatics

Biomedical Data Mining, Spatial
Gaussian Process Models in Spatial Data Mining
Pandemics, Detection and Management

Revesz, Peter: Spatial Constraint Databases

Constraint Database Queries
Constraint Databases and Data Interpolation

Constraint Databases and Moving Objects
Constraint Databases, Spatial
Linear Versus Polynomial Constraint Databases
Visualizing Constraint Data

Samal, Ashok: Spatial Analysis

Computing Fitness of Use of Geospatial Datasets
Conflation of Features
Feature Extraction, Abstract

Schneider, Markus: Representation of Inexact Spatial Information

Objects with Broad Boundaries
Representing Regions with Indeterminate Boundaries
Vague Spatial Data Types

Shahabi, Cyrus: Road Network Databases

Fastest-Path Computation
Nearest Neighbor Queries in Network Databases
Road Network Data Model
Trip Planning Queries in Road Network Databases
Voronoi Diagrams for Query Processing

Sharma, Jayant: GIS in Business Intelligence, Routing

Location Intelligence
Routing Vehicles, Algorithms

Tao, Yufei: Spatial Indexing

iDistance Techniques
Indexing, Hilbert R-Tree, Spatial Indexing, Multimedia Indexing
Indexing, X-Tree
Pyramid Technique
R*-tree

Tsotras, Vassilis: Spatio-temporal Databases

Continuous Queries in Spatio-temporal Databases
Indexing, BDual Tree
Indexing of Moving Objects, B^X-Tree
Indexing, Query and Velocity-Constrained
Indexing Schemes for Multi-dimensional Moving Objects
Indexing Spatio-temporal Archives
Indexing the Positions of Continuously Moving Objects
Mobile Object Indexing
Queries in Spatio-temporal Databases, Time Parameterized
Spatio-temporal Queries on Road Networks, Coding Based Methods

Wolfson, Ouri: Spatial Aspects of Mobile Computing

Mobile P2P Databases
Moving Object Languages
Moving Object Uncertainty

Yang, Chaowei (Phil): Spatial Aspects of Distributed Computing

Data Compression for Network GIS
Distributed Geospatial Computing (DGC)
Geocollaboration
Grid, Geospatial
Information Services, Geography
Internet-Based Spatial Information Retrieval
Network GIS Performance

Zhang, Pusheng: Spatial Time Series

Correlation Queries in Spatial Time Series Data
Indexing and Mining Time Series Data
Spatio-temporal Query Languages
Trajectories, Discovering Similar

Zhou, Naijun: Data Exchange and Interoperability

Conflation of Geospatial Data
Database Schema Integration
Dimensionally Extended Nine-Intersection Model (DE-9IM)
Geospatial Semantic Integration
Ontology-Based Geospatial Data Integration
Spatial Data Transfer Standard (SDTS)
