VOLUME I—APPLICATIONS AND CARTOGRAPHY

CHAPTER 1: INTRODUCING ArcObjects	1
ArcObjects Developer Help system	5
Reading object model diagrams	10
Getting started with VBA and ArcObjects	14
Top ArcObjects	24
ArcObjects problem solving guide	56
CHAPTER 2: DEVELOPING WITH ArcObjects	75
The Microsoft Component Object Model	76
Developing with ArcObjects and COM	89
The Visual Basic environment	100
Visual Basic for Applications	114
The Visual Basic development environment	120
Visual Basic developer add-ins	128
Visual C	140
Active Template Library	164
Packaging and deploying customizations	176
Bibliography	179
CHAPTER 3: CUSTOMIZING THE USER INTERFACE	181
Application framework objects	182
Customizing through documents and templates	184
Extending ArcGIS applications	191
Framework dialog box objects	240
CHAPTER 4: COMPOSING MAPS	249
ArcMap core objects	250
ArcMap page layout objects	284
ArcMap map element objects	298
ArcMap data window objects	314
ArcMap map layer objects	328
ArcMap map surround objects	371
ArcMap spatial bookmark objects	384
ArcMap style gallery objects	387
ArcMap map grid objects	398
ArcMap number format objects	416
ArcMap labeling objects	432
Customizing ArcMap through Automation	444

CHAPTER 5: DISPLAYING GRAPHICS	449
Feature renderer objects	450
Creating a custom renderer	477
Color objects	483
Symbol objects	502
Marker symbol objects	509
Line symbol objects	518
Fill symbol objects	533
Text symbol objects	543
3D chart symbol objects	558
Frame decoration objects	545
Display objects	549
Display application patterns	574
Classify objects	579
Rubber band objects	589
Selection tracker objects	591
Display feedback objects	599
CHAPTER 6: DIRECTING MAP OUTPUT	627
Printer objects	628
Exporter objects	642
CHAPTER 7: WORKING WITH THE CATALOG	657
ArcCatalog concepts	658
GxView, GxApplication, and related objects	644
GxObject and related objects	680
FindDialog and related objects	708
Metadata objects	715
INDEX	vii

VOLUME 2—GEOGRAPHIC DATA MANAGEMENT

CHAPTER 8: ACCESSING THE GEODATABASE	729
Core geodatabase model	730
Workspace and name objects	732
Dataset objects	744
Table, object class, and feature class objects	774
Row, object, and feature objects	798
Query, cursor, and selection objects	809
Relationship objects	827
Class extension objects	832
Annotation and dimension objects	845
Domains and validation rule objects	858
Geometric network objects	848
Versioning objects	886
Data converter objects	898
ArcInfo coverage objects	907
Metadata objects	921
On-the-fly table join objects	942
Dynamic segmentation objects	957
XY Event objects	975

CHAPTER 9: SHAPING FEATURES WITH GEOMETRY	979
<i>Geometry object model</i>	980
3D <i>geometry objects</i>	1058
CHAPTER 10: MANAGING THE SPATIAL REFERENCE	1049
CHAPTER 11: EDITING FEATURES	1127
CHAPTER 12: SOLVING LINEAR NETWORKS	1143
CHAPTER 13: INTEGRATING RASTER DATA	1203
APPENDIX A: OPEN DATA ACCESS IN ArcGIS	1273
APPENDIX B: GEODATABASE MODELING WITH UML	1283
APPENDIX C: DEVELOPING FOR ArcGIS DEPLOYMENTS	1293
APPENDIX D: DEVELOPING WITH THE MAP CONTROL	1303
INDEX	vi
